Victorian Eco-Innovation
Lab Solar Shade

Client
VEIL

Date
2007

Project team
Soren Luckins
Sarah Napier
Tom Allnutt

As a government funded initiative, the VEIL solar-shade is a future possibility for the integration of solar-energy harvesting technologies into a form that is pragmatic (providing shade & energy), evocative and educational.

Current Australian school curriculums utilize information around consumption and energy as an educational device, and we have designed this interactive concept to explore the visual connection between energy collection and consumption.
