(a) PP2A is required for dephosphorylation of ULK1 at S637. MEFs were transduced with lentivirus containing control shRNA or shRNA targeting the catalytic subunit of PP2A (PP2AC). 48–72 h post transduction, cells were incubated in starvation media for the indicated time and lysed for immunoblotting. (b) PP1C is not required for ULK1 dephosphorylation. MEF cells were treated as in a with shRNA targeting the catalytic subunit of PP1 (PP1C). (c) PP2AC directly dephosphorylates ULK1 S637 in vitro. The Federal Energy Regulatory Commission (FERC) amended its regulations governing the provision of unbundled pipeline transportation service (see discussion of Orders 636 and 436 below) in response to the growing development of more competitive markets for natural gas and its transportation. As an experiment, the rule waived for a two-year period cost-based price ceilings for short-term releases of capacity by shippers with long-term rights to the capacity. FERC later reinstated the cap.
