A comprehensive how-to manual for traffic calming in the United States. Planners and engineers can look to this manual for guidance on the appropriate use, design, and signing and marking of traffic-calming measures. For local officials, developers, and community associations, it is an introduction to the goals and tactics of traffic calming. The Virginia Department of Transportation's (VDOT) traffic calming program applies only to streets maintained by VDOT and is intended for existing, neighborhood streets that provide direct access to residences where the speed limit is 25 mph or less. It is not intended for high-speed, high-volume roads whose primary purpose is to move traffic. Traffic calming measures are techniques aimed at reducing vehicular traffic speeds to improve safety in pedestrian areas and neighborhoods. Several studies have suggested that walking and biking activity increases in neighborhoods that have these measures in place. Information on U.S. experiences with various traffic-calming measures can be found in ITE's Traffic Calming: State of the Practice. Devices should accommodate emergency vehicles. Emergency response times shall be considered. Traffic-calming areas or facilities should be adequately signed, marked, and lit to be visible to motorists. Traffic calming can play a key role in creating safe routes to school by reducing vehicle speeds and volumes and creating a comfortable and attractive neighborhood bicycle and pedestrian environment. The measures previously described are just a few examples of many available traffic calming tools. Aug 15, · A comprehensive how-to manual for traffic calming in the United States.
