Dec 26, · Hello have few questions first can i even do this i am looking to install a Fike twinflex pro fire alarm system in my home i have gotten the ok from my housing association to do this but am i allowed to do this by law i have been looking into it and have seen most systems need design plans, installation certificate and a commissioning certificate but as i am installing this system in my own. The Fike Twinflex Pro 4 Zone Fire Alarm Panel is classed as an analogue non-addressable panel and is capable of running up to devices in total. Using a conventional cabling format, devices communicate with the panel using the Twinflex data protocol. As part of your fire alarm system, Fike Video Analytics can significantly improve your organization's response time and communication in the event of a fire. This technology is ideal for challenging environments as it quickly identifies the presence of smoke, flame or oil mist at its source, and it may be programmed to sound an alarm, release. The Fike Twinflex Multipoint Detector is a single device providing all the features of normal conventional smoke and heat detectors in a single unit, which can be configured to operate in one of seven modes to suit the environment in which it is located. The device is available with or without an integral sounder, but is otherwise universal in its application.
