They are placed on doors or windows. When the alarm system is armed, they will trigger an alarm as soon as their magnetic contact is broken by the door or window opening. Motion Detector: A motion detector is a device that uses Passive Infrared scanning (PIR) to detect unauthorized motion to set off the alarm. Ring Alarm gives you the option to enable 24/7 Ring Alarm Professional Monitoring and is equipped with battery backup and LTE cellular backup to ensure the system is always up and running even if your power goes out or broadband is unavailable (with a Ring Protect Plus plan). Gets the current gap-time setting of the detector. When run in Frame_Rate_exposure mode the detector will insert this gap period between consecutive frames in an image sequence. Note: The minimum time for the gap-time setting is the current readout-time for the detector. Attempting to write anything smaller to the detector will result in a gap-time equal to the readout-time.
